Gum disease is a medical condition that only your dental team can treat!

Did you know that more than 80%% of North Americans have some form of gum disease, which if left untreated, can lead to tooth loss and cause or contribute to a variety of medical conditions such as heart disease, diabetes, Alzheimer's Disease, rheumatoid arthritis and certain forms of cancer.

We at <clinic name> not only specialize in treating gum disease, we are one of the first dental offices in the area to become an OraVital® Certified Clinic and to participate in the OraVital® System Results Guarantee.

The key to this ground-breaking guarantee is the patent-pending and painless protocol developed by Canadian oral health innovator OraVital Inc., which consists of advanced and affordable microbiology tests, which guide the dental clinician in prescribing the correct regimen of OraVital® Antibiotic Rinses (instead of commonly-prescribed antibiotic pills that often have side-effects) to effectively control the harmful bacteria that cause gum disease and breath odor.

OraVital USA Inc.

4410 Massachusetts Avenue NW, Suite 289, Washington, DC 20016 tf 1 800 909 6468 • www.oravital.com

CORPORATE OFFICE 111 Railside Road, Suite 100 Toronto ON Canada M3A 1B2 t 416 324 8675 tf 1 800 909 6468

The OraVital System also includes a unique patient home care regimen designed to keep harmful bacteria under control. When used by our specially-trained and certified dental team on patients who carefully follow our recommended gum and home care instructions, the OraVital system will predictably control the oral infections that cause gingivitis and mild to moderate periodontal disease.” *

Under the terms of the guarantee, if despite following the clinically-proven* OraVital System Protocol, there is not a noticeable improvement in the patient’s oral health, which is defined as an 80% reduction of bleeding and reduction of gum pockets that were 6 mm or less at the beginning of therapy, the patient will be re-tested and re-treated one additional time free of charge, while under the careful guidance of an OraVital® Clinical Coach who will be assigned to < Clinic Name> and its patient.

If you have any signs of gum disease, such as bleeding when brushing or flossing, swollen or red gums, chronic bad breath, receding gums, loose teeth, or a persistent bad taste in your mouth, call us without delay at <Clinic Phone Number> or visit www.ClinicURL.com.
